

ENERGY SERVICES

Are you aware of upcoming energy deadlines? The target adjustment for energy reporting deadline is June 30th. MTech Energy has the resources to reduce your risk through Energy Audits, Reclassification and Data Verification!

Energy Audits & Assessments

System Upgrades Through Design-Build

Benchmarking & Retro-Commissioning

MTech Energy expands our diversified services for clients to include energy efficiency retrofits, lighting improvements, renewable energy generation, and building envelope improvements. Through our in-house Energy and Design-Build teams we can offer comprehensive projects to include Mechanical, Electrical, Solar, Geo-Thermal, Building Envelope, and Measurement & Verification.

Our energy group will focus on offering energy based solutions which will incorporate Federal incentives such as the Federal Inflation Reduction Act, utility rebates and utility bill savings to expedite return on investment and reduce the financial impact of electrification and energy efficiency mandates on facility owners.

RECENT SUCCESSFUL CLIENT CASE STUDIES

Client #1
Broadcasting Facility
Reclassification of Facility from Office Space to Data Center

Reduced Fine Potential by Approximately \$5M!

Client #2
High-Rise Apartment
Baseline Adjustment to Reflect an Efficiency Project Done in 2018

Reduced Fine Potential by Approximately \$250K

Client #3
Multi-Building Condos
Energy Audit Report & Presented Conservation Measure Opportunities

Pathway to compliance with rebates & incentives

OUR PROCESS

At MTech, we understand the importance and timeliness of building a energy team to provide this valuable offering to the marketplace. We have developed a team specifically designed to meet Environmental Social Governance (ESG) Goals, Greenhouse Gas Reduction Goals, and deferred maintenance benchmarking for facility owners in Colorado.

MTech now has a comprehensive “turnkey” solution for energy projects moving forward for our existing and new clients. This will allow us to be proactive in responding to the electrification and energy efficiency requirements that will be enacted by local municipalities in the coming years.
